Mr Roger Lee
Refrigeration Engineering Co Ltd
PO Box 12072
PENROSE AUCKLAND
NEW ZEALAND

Department of
Justice and Attorney-General

Dear Mr Lee

NOTICE OF REGISTRATION OF PRESCRIBED ELECTRICAL EQUIPMENT

I refer to your recent application for energy efficiency registration, 49764. The application satisfies the requirements prescribed under the *Electricity Regulation 2006* and has been approved as follows:

Equipment Type Air Conditioner	Brand Name GREE	Model GJH18AC-K3MNB8A
Registration No. QAC2023	Relevant Standard AS/NZS 3823	
Rollover date 30 September 2011	Expiry Date 11 May 2015	

The registration relates to the current Australian/New Zealand Standard. As the performance standards change from time to time the registration will rollover annually from 30th September 2011 but will continue until 11th May 2015 provided your product complies with the performance or energy efficiency requirements of the relevant standard in force at any point in time and there are no changes to your stated energy performance ratings.

Please Note: More stringent MEPS Levels beyond 2011 are currently being considered.

The registration will automatically cease if the standard is amended and your product no longer complies with the energy performance requirements, or the standard expires. You are also required to apply for a new registration if you make any changes to your product which may affect its energy efficiency performance, or you make changes that affect the details of your registration, such as a changed brand name or additional models.

As registration holder you are responsible for ensuring the product continues to meet the stated energy performance ratings. The Electrical Safety Office actively participates in the national check-testing program and significant penalties, including registration cancellation, will apply for non-compliance.

Yours sincerely

BRIAN RICHARDSON
Director Equipment Safety
